Areas of application

→ LOGISTICS

→ ENERGY SECTOR

With **Aerial Pipeline**, SEIK applies to hydraulic pipelines the technologies and expertise developed in the field of cable transport systems.

The solution makes it possible to overcome distances and orographic obstacles such as rivers, valleys, and natural barriers, connecting the source to the delivery area. It is therefore particularly suitable for rugged or hard-to-access areas.

Aerial Pipeline

Depending on project requirements, the system can be equipped with various types of **valves** and devices, including filling and discharge systems, vents, and overpressure protection systems, ensuring **safety, operational continuity, and easy monitoring.**

The possibility of **remote control and management** completes the digital integration of the system, making Aerial Pipeline a modern, efficient solution that can be easily adapted to different application scenarios.

Aerial Pipeline

KEY STRENGTHS

CONSTRUCTION QUALITY

EFFICIENCY

FLEXIBILITY

SUSTAINABLE TECH

TERRAIN ADAPTABILITY

Ideal for rugged and difficult-to-access areas

ROPEWAY TECHNOLOGY

Developed based on material ropeway technology and Seik's know-how

CONFIGURABLE

Adaptable and customizable according to project requirements

COST OPTIMIZATION

Reduced construction and maintenance costs

SUSTAINABILITY

Reduction of excavation works and impact on the surrounding area

Transport by Rope - design, production, sale and rental of ropeways, winches and cable cranes
