→ LOGISTICS

Seik's Skycargo is a **fully electric system** designed for the transportation of goods in remote or mountainous areas. Ideal for **mountain huts, farmhouses and agricultural activities**, it offers a reliable solution for transportation in challenging environments.

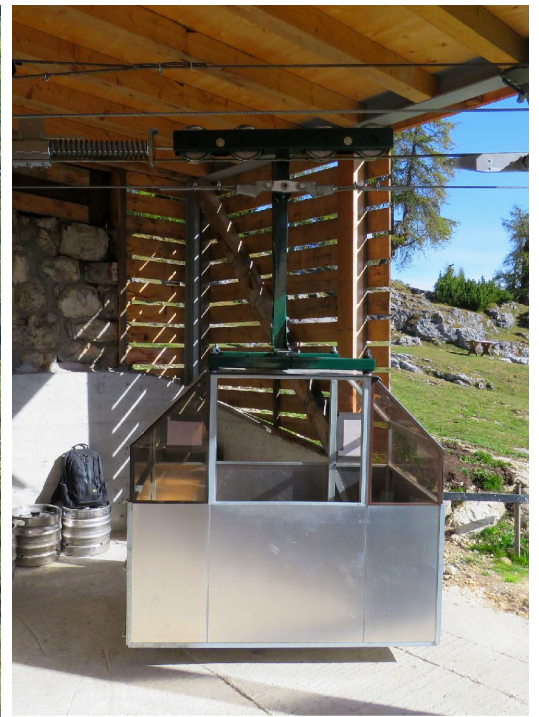

Its design optimizes **safety, operability, and sustainability** thanks to control systems, automation, and the type of power supply.

Seik's experience ensures a system that combines **advanced technology**, safety, and adaptability, optimizing operations and reducing overall costs.

Skycargo

Seik's Skycargo is a closed-loop cableway system, powered by an electric motor, completely automatic and controlled via a control desk. The absence of hydraulic components and complex mechanical systems ensures **reliable, silent, emission-free operation** with **minimal maintenance** requirements. The modular design adapts flexibly to any terrain, offering low-impact solutions in **harmony with the environment**.

For mountain **huts**, **farmhouses**, or **other locations with difficult access**, Skycargo ensures transportation independent of weather conditions or terrain morphology. Safety, reliability, and speed are the true strengths of Seik's Skycargo.

Transport by Rope - design, production, sale and rental of ropeways, winches and cable cranes
