INNOVATION

Areas of application

ENERGY SECTOR

CONSTRUCTION

Skytruck by Seik combines the advantages of a traditional overhead crane and rope systems, overcoming the limitations of conventional cranes.

The Skytruck system is based on a beam suspended on ropes, with movement controlled by a ground winch and an integrated translation system. The double pair of suspension ropes ensures stability and smooth operation, providing a versatile and secure solution.

Skytruck is ideal for **complex projects** where versatility, environmental criticalities and safety are essential, making every construction site more efficient and safe.

Skytruck

Constant Load Capacity

Load management with SkyTruck is precise and optimized. Thanks to the controlled handling system via remote control or operator cabin, loads are managed with great accuracy, even under difficult conditions. The system ensures a constant load capacity over a large operational area, maintaining the same lifting performance at every point for fast and precise positioning.

Precision Handling and Stability

Minimal oscillations, similar to those of an overhead crane, provide optimal stability even in extreme environments. This precision handling not only enhances the accuracy of load positioning but also improves the overall efficiency and safety of lifting operations. By reducing swaying and ensuring steady control, the system offers superior performance in challenging conditions, ensuring safer and more reliable outcomes.

Skytruck

Adaptability and versatility

SkyTruck is designed to operate in complex environments and on inclined terrains, ensuring consistent and reliable performance. Its small ground footprint minimizes interference with other activities, enhancing safety and keeping the work area clear. The quick installation, with minimal auxiliary works, allows for immediate operation start, optimizing intervention times.

Efficiency and optimized productivity

SkyTruck is designed to maximize productivity and simplify operator use. The intuitive interface and advanced control system increase action speed, reducing working times and enhancing operational efficiency. The constant load capacity and optimal load management ensure smooth and continuous operations, increasing productivity at job sites with minimal environmental impact.

Models

Skytruck

Skytruck 100

- ✓ Load capacity up to 10t
- ✓ Traverse width up to 80m
- ✓ Remote control
- ✓ 100% electric

Skytruck 200

- ✓ Load capacity up to 20t
- ✓ Traverse width up to 55m
- ✓ Remote control or operator cabin

Skytruck 300

- ✓ Load capacity up to 30t
- ✓ Traverse width up to 40m
- ✓ Remote control or operator cabin

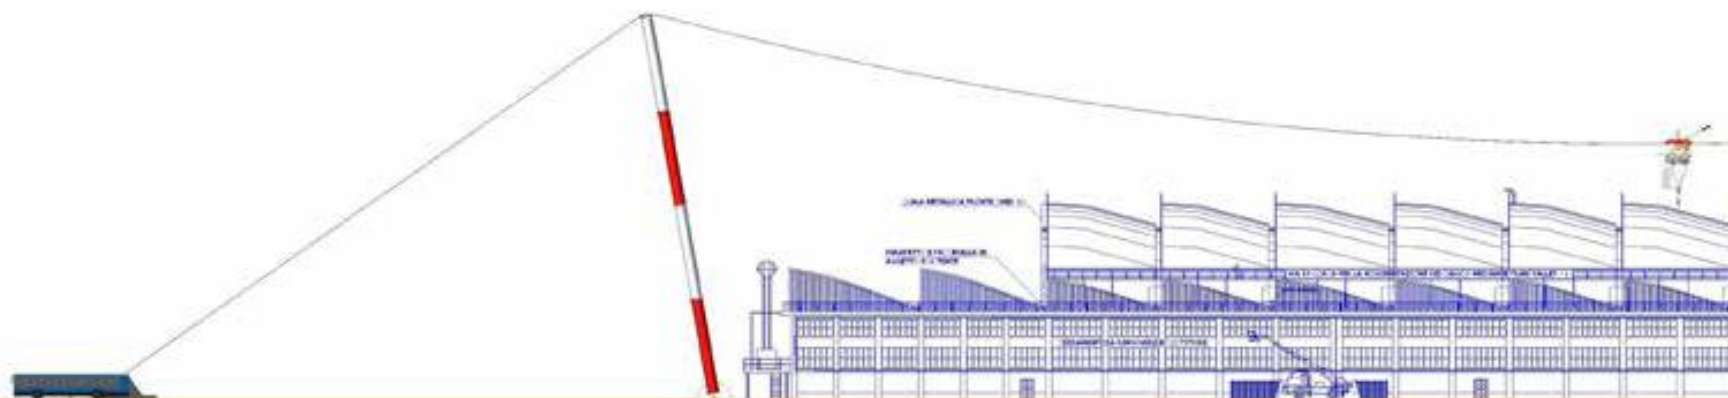

Skytruck 400

- ✓ Load capacity up to 40t
- ✓ Traverse width up to 110m
- ✓ Remote control or operator cabin

Skytruck 600

- ✓ Load capacity up to 60t
- ✓ Traverse width up to 80m
- ✓ Remote control or operator cabin

Coming soon

Transport by Rope - design, production, sale and rental of ropeways, winches and cable cranes
